

## The School Attendance and Home Learning Experiences Survey

Before COVID, for every 10 days of school missed...

- 4 days were lost because the child **did not want to go to school.**
- 3 because of **poor health.**
- 1 because of **school exclusion.**

In a UK-first, our research shone the light on the difficulties families with autistic children face every single day.

Do you have an **autistic child**? Do you have a **child with a learning (intellectual) disability**?  
Do you have an **autistic child with a learning disability**?

Is your child aged between 5 and 15 years old?

Our children are more vulnerable to missing school.  
We are interested in understanding school attendance since the pandemic, and also home learning.

After COVID-19...

- Did you send your child back to school?
- Is your child more anxious?
- Is your child less anxious?
- What will you do this coming September?

Do you want to help **shape SEND educational policy for COVID-19** recovery for our most vulnerable children?
